Haven is the third, and final, installment in the Head Case rock novel series. Through love, loss and friendship, members of the band Pages have experienced it all. And they've experienced it all together. Love them or hate them, Regi, Mickey, Jesse and Murphy face their toughest challenges yet in this finale - a paternity shocker, a long lost parent, the protection of an abused child, and a reunion in shambles before it even begins. Come along on their final adventure and enjoy the ride! Like Facebook and other social media sites today that allow us to reconnect with people from our past, in Haven, Kathleen Stone bridges the gap and brings Regi, Mickey and Jesse right back to us once again. The whole wild saga that began years ago in a quintessential whirlwind of sex, drugs, and rock and roll has now evolved with children and real-life situations that all Stone's readers can relate to, but they're all just fibers in the great membrane which holds them all together — the band. Kathleen Stone's tone and flow is a relaxed personal one — reading her words is like sitting across the table from a good friend at a cafe as she fills you in on everything that's been happening since your last meeting. Whether you're a musician, a music enthusiast, or simply a fan of literature, the characters in Stone's rock and roll chronicles become friends, and being able to catch up with them once again is an experience that runs the gamut of emotion, but overall, provides an abundance of comfort that only other really good things in life can.
