With her brother kidnapped, at least Haddie and her inconveniently unliving mother want the same thing—sort of. Even with it clear that Madelyn and the Huntsmen are fair game, Haddie needs all the help she can get. Now hunted by her father, the human authorities, and possibly whoever took Damian, it's not exactly a time to be picky. Forming an uneasy partnership, Haddie is quickly dragged from the vampire dominion into the werewolf territories where they suspect Damian has been taken. With the Huntsmen out of reach and even her father's enforcers too scared to follow, it's setting a new precedent as far as risky plans. Between age-old blood feuds and questionable allies, it looks like Haddie will get to prove just how much she'd risk for family.
