Molly is broken. After her world is torn from her one cold February night, all hope leaves her, and merely existing is the best she can do. Imogen is lost. When she is forced to leave the life she loves and is thrown into a new one, she struggles to adapt to everything that's expected of her. When they meet each other, they're like chalk and cheese. They're opposites and yet they are, in a strange way, the same. Both fighting to find who they are in a world that's very different from what they know. They form a bond that cannot be broken. Imogen helps Molly love life again, and Molly teaches Imogen what living really is. And when new loves come into their lives, they help one another to see a future beyond the darkness they've both embraced as permanent. But is Imogen all she appears to be? And is it true what they say: if something seems too good to be true then it probably is? Delve into Imogen and Molly's world in the first book in the Protectors of Light series.
