Wake Up to Powerful Living is a concise guide that lays out 12 principles to help anyone transform their life. The book explains that far too many people are simply sleepwalking their way through life feeling unfulfilled and unhappy. But it doesn't have to be that way. Anyone can take control of their life and begin to shape it in a way that's more fulfilling by simply following the 12 principles. Each principle builds on the others, so by mastering one, you begin to master them all. For example, following principle #1 (take personal responsibility for your life), makes it easier to follow principle #5 (forgive). Practicing principle #3 (take control of your thinking) makes it easier to practice principle #11 (focus on what you want and take action). The author explains how each principle leads to personal fulfillment and offers advice on how to incorporate them into your life!
