According to legend, the hot springs on Seeker's Island--a small island resort in the Gulf of Mexico--are magical. If you sit in them, you will obtain your heart's desire. Teddy Mack would love the legend of the hot springs to be true--for she's been banished to the non-wifi-equipped island in order to finish an overdue book for her publisher. But when a surprisingly intriguing, yet nerdy microbiologist, Oscar London, ends up booked for the same small cottage, she might find herself even more distracted from her project....
