Aaron Landon doubts he'll accomplish anything significant for mankind during this mining mission in these dusty parts of the galaxy. Finding planets with valuable resources would be useful but not truly important. Thirty years ago, the discovery made by Aaron's great-grandfather had changed the course of history on two planets. Aaron wished his life could be that meaningful. When he stumbles upon another intelligent species, it is a leap in the right direction. The crew of the Phoenix discovers a world where every living soul professes belief in God. What could such a world be like? Will it be heavenly ... or hellish? What will they think of these humans when some of them don't even believe in God? Bonfire is theologically sound Christian Science Fiction that does not shy away from the Gospel. It concludes the initial trilogy leaving you in awe of God's power and wisdom not only in this fictional reality but in ours as well.
