Nature's patterns are displayed in beautiful, high quality images with engaging, lyrical descriptions. Delightful viewing and reading for children or adults showcasing our beautiful environment. The descriptions are appropriate for older children to read or for early readers to be guided through. These nature photos are captivating enough for a child of any age (even an adult) to simply view and marvel at the natural world's beautiful patterns. The beautiful photos include the rich and varied patterns of animals, plants and much more from the wonders of the natural world around us. From the book: "The types of patterns seen throughout nature are infinite. They are revealed in plants, animals and minerals; on the land and under the sea. There is a magnificent world in nature and the enjoyment is never ending."
