A sequel that will far exceed your expectations! “Cindy did say we could do something intending to mean well and it could have unintended consequences.” “Meaning well isn’t always enough. There are limits to what you can control, even if you could freely skip about in time. We all have limits and we have to be aware of them.” After Max pulls off a rescue from a timeline that his time travel created, his family is united back in 1987 and ready to welcome a new addition until something unexpected divides them up again. Does someone from the future have the upper hand on Max? Can Max unravel the secrets of a forgotten timeline to save his family from a villain determined to stop him? Get ready for more thrills, laughs, and suspense as we join the Hartleys and their friends in a race through time to see which timeline prevails and who survives it all.
