Dangerous Animals of the Sea This is an illustrated quiz book that offers children ages 9 – 12 a look at the many unique creatures that live under water. This collection of trivia questions, explores a wide range of common and truly unique aquatic life. These questions go beyond the basic animals that first come to mind. While there are questions on sharks, stingrays and even jelly fish, children will also have a chance to learn and explore the yellow sea anemone and the striped surgeonfish. Some of the questions you will find in this book include: - What speed can the dangerous barracuda swim? - How many venomous species of fish live in the seas of the world? - How many teeth will a shark have in its lifetime? Children will find that the questions will have them thinking, while missed answers provide an opportunity to entice curiosity about these unique creatures. This makes it an excellent learning tool to pique the curiosity of your child, while providing them with a series of questions they will love. If your child has taken an interest in aquatic life and you want to provide them with a fun and educational tool, then Dangerous Animals of the Sea will be the perfect choice. Each question has been researched and provides accurate information combined with fun facts that will not only test their knowledge, but reward your child with additional facts when they find the right answer.
