It is the turn of the 20th century, a time of great danger, not only for Europe but for the entire world. Britain and Germany are viewing each other with deep suspicion and preparing for the hostilities that are to come. Germany has already discovered and mined some mysterious crystals that have properties that could transform dramatically the global balance of power to Germany's benefit, and its spies report back that Britain has just unearthed similar, but different, ones in its Hamstead Colliery. Top German agent, Rupert Mueller, Freiherr von Landheim, is sent on a spying mission to England to investigate this new discovery and to obtain samples to be analysed back in Germany, but he is unaware of what is really at stake and how dark forces are massing to either dominate the world or bring about its total destruction.
