Intimate Collision is a great book in which Dr. Lounsbrough takes us through his work as a Christian psychotherapist and brings home that for meaning and purpose to come into our lives and to have strength in times of illness, death, and need we need a firm foundation in the Gospel. I believe that people can find God in many places, mine is Jesus, but until they move from the me and self centered approach and see life as it really is they will have difficulty. I believe this speaks top the problems of our society today.
